Updated Nevada Medicaid Informational Bulletin on Medications and Services for Substance Use Disorders

Update to Web Announcement 1259:

This bulletin is informational only and does not supersede any policy or information documented in the Fee-for-Service (FFS) or Managed Care Organization (MCO) policy and billing manuals.

Nevada Medicaid consists of four different health care plans:

1. Fee-for-Service (FFS)
2. Amerigroup Community Care (AGP) (MCO)
3. Health Plan of Nevada (HPN) (MCO)
4. SilverSummit Healthplan (SSH) (MCO)

Before providing any services to a Medicaid recipient, it is important to verify in which plan the recipient is enrolled, and that the recipient is currently eligible. Both eligibility status and plan enrollment are subject to change.

All pharmacies and servicing providers must be actively enrolled in the FFS system even if they do not intend to see FFS recipients. They must also enroll with each MCO for whose recipients they wish to provide services. The same rules apply to medical prescribers, except that they may complete an abbreviated enrollment as an Ordering/Prescribing/Referring (OPR) provider if they do not wish to bill for any services themselves.

Medicaid-Covered Outpatient Drugs used for Opioid Addiction

These drugs may be subject to prior authorization (PA) approval and/or quantity limits (QL) and Preferred Drug List (PDL) status.

Medication-Assisted Treatment

Medication-assisted treatment (MAT), including opioid treatment programs, combines behavioral therapy and medications to treat substance use disorders as defined by the Substance Abuse and Mental Health Services Administration (SAMHSA). MAT is a combination of medications and services that are provided in concert to assist recipients with a substance use disorder.
