Web Announcement 147

New Online Tool Manages Access to EVS, OPAS and the new Pharmacy Web PA

First Health Services has developed a free, innovative web-based registration and user management tool for Nevada Medicaid/Nevada Check Up providers who use the Electronic Verification System (EVS), the Online Prior Authorization System (OPAS) and/or Pharmacy Web PA (the system coming soon for providers who submit PA requests for prescription drugs).

Through the new User Administration Console (UAC), which will be online July 2, 2007, providers will choose their own Delegated Administrator who will create users and grant users appropriate access to EVS, OPAS and/or Pharmacy Web PA.

Registration can be completed in three easy steps:
1. Request a Personal Identification Number (PIN).
2. Register with the PIN.
3. Activate your account via email and add the appropriate roles.

Please read the attached letter for further details. Beginning July 2, you may access UAC by clicking on the "User Administration" link in the top right corner of First Health Services' homepage.

UAC product information, user guides and tutorials are posted at
https://www.fhsc.com/reference/uac/
