Procedure Codes 99406 and 99407 for Smoking Cessation Counseling Are Used for Pregnant Women Only

Current Procedural Terminology (CPT) codes 99406 and 99407 are used to bill smoking cessation counseling for pregnant women only. For all other recipients, these services are billed using the appropriate Evaluation and Management (E&M) office visit code. Do not use codes 99406 and 99407 for recipients who are not pregnant women. Bill codes 99406 and 99407 with proper diagnostic codes indicating pregnancy. Claims for services submitted for recipients other than women who are pregnant will be denied and if paid in error may be subject to recoupment.
