Announcement 1871

Attention Provider Type 33 (Durable Medical Equipment, Prosthetics, Orthotics and Supplies):

Items Subject to DMEPOS Competitive Bidding Program Number 3 Supplied with Complex Rehabilitative Power Group 3 Wheelchairs

Update to [Web Announcement 1677](#): The KU modifier must be reported on the prior authorization (PA) and the claim for Complex Rehabilitative Power Group 3 Wheelchairs for the provider to receive the correct reimbursement.

When submitting claims for Medicaid, providers will only use the KU modifier. For crossovers, a combination will be required as Medicare has other rate options available. For example, instead of billing using the NU/KU modifier combination to receive the enhanced rate, the claim should include KU as the first modifier. Nevada Medicaid has set the rate for the KU option at the NU/KU rate Medicare uses.

Systems updates are anticipated in the future that will allow for two payment modifiers as an enhancement to current payment options when associated with the KU modifier. Updates will be provided in future web announcements.

The above instructions apply to the following Healthcare Common Procedural Coding System (HCPCS) codes:
