Nevada Medicaid Web Announcement 3193

Reminder Regarding Services Provided Through School Health Services (Provider Type 60)

Service limitations for services rendered in a school setting through the School Health Services (SHS) (provider type 60) program are counted separately and are not subject to the same service limitations as community providers.

The services rendered through SHS *do not* affect prior authorization requirements for services provided by any other provider type in the community setting.

Please note that there has been *no change* to Division of Health Care Financing and Policy (DHCFP) policy regarding this matter; this announcement is for clarification purposes only.

Additional clarification will be added to the [Medicaid Services Manual Chapter 2800 – School Health Services](#).
