CMS-1500 Claim Form Computer Based Training (CBT)

Providers who have new individuals performing CMS-1500 Claim Form billing have a new resource for training. Instead of having to attend a workshop outside of their office, individuals may take a Computer Based Training (CBT) course that provides an overview for how to complete CMS-1500 Claim Forms correctly.

The new CMS-1500 CBT course can be found on the [Provider Training](#) webpage of the Provider Web Portal (select "Provider Training" from the "Providers" tab). The course is designed to take approximately 20-25 minutes and can be taken as often as desired.

The CMS-1500 CBT course is a high-level overview for conditional, required or not required fields on the form. A description of every field provides guidance on the appropriate information to be entered (or not entered). The CMS-1500 CBT course is not intended to replace the Billing Manual or the Billing Guidelines for each provider type.

Please direct questions about the new CMS-1500 CBT course to the HPES Training Team at: NevadaProviderTraining@hp.com.

Additionally, workshop materials will be published on the Provider Training webpage for providers' reference. Please review these new features.
