Announcement 763

Qualified Mental Health Associate (QMHA Specialty 301) Provider Enrollment Qualifications

The Provider Enrollment Checklist for Qualified Mental Health Associate (QMHA), specialty 301 for provider types 14 and 82 (Behavioral Health Outpatient Treatment and Behavioral Health Rehabilitative Treatment), has been updated. The qualifications for QMHA are found in the [Medicaid Services Manual \(MSM\)](#) Chapter 400 Section 403.3.A. **The qualifications to enroll as a QMHA have not changed.** The Enrollment Checklist has been updated to better align with existing State policy and to further clarify the accepted documentation for enrollment as a QMHA. It provides additional information when the applicant is utilizing the enrollment option that includes credits in an accepted course of study as well as demonstration of full-time relevant professional experience.

Please note the updated Enrollment Checklist and requirements will be required with all QMHA enrollment requests received July 7, 2014, forward. Any enrollment received on or after July 7, 2014, with the previous checklist or missing requirements as noted on the updated checklist will be returned.

The updated [QMHA Enrollment Checklist](#) is located on the Provider Enrollment Checklists webpage at www.medicaid.nv.gov.
